Series 5000: Students, Curriculum, and Academic Matters

5700 Student Health and Safety

5709 Lice, Nits, and Bed Bugs

A. Lice and Nits

A student with nits within ¼ inch of the scalp or live lice may remain at school until the end of the school day. The student will be restricted from activities that involve close head-to-head contact or sharing of personal items. The District will notify the student's Parent and provide educational materials on head lice prevention and treatment.

The student will be readmitted to school after treatment so long as the Parent consents to a head examination and the examining District official does not find live lice on the student. If the District official finds nits within ¼ inch of the student's scalp, the student may return to class, but the District must inform the student's Parent about the need to remove the nits.

District personnel will not ostracize or embarrass a student with lice or nits and will maintain student confidentiality.

If a student has a persistent infestation after 6 weeks or 3 separate cases within 1 school year, the District will form a team that may include the student's Parents, teacher, social workers, or administrators to determine the best approach to resolve the issue.

B. Bed Bugs

If a District official suspects that a student's clothing or belongings contain bed bugs, the school nurse or other District official may visually inspect the student's clothing or belongings. Any bugs found should be removed and collected for identification. If a live bed bug is discovered, the District will notify the student's Parent and provide educational materials on bed bug prevention and treatment.

If a student's clothing or belongings are infested by bed bugs, the student may be excluded from school until the Parent has confirmed that successful treatment has occurred or other remedial steps have been taken to ensure that bed bugs are not brought to school.

If bed bugs are found in a classroom or elsewhere in the school building, the building principal or designee will notify the Parents of all students in the affected school building and will provide information on bed bug prevention and treatment. The school building will not be closed due to bed bug presence. If pest management is necessary, it will be provided to affected areas of the school building consistent with Policy 3406.
